

Tech Tip

Create Maximo Sample SQL Server Database

Products: Microsoft SQL Server, Maximo 7.5.0.3

Document Number: TRI-MAX-D-001

Prerequisites and Assumptions:

- Ensure Maximo is Installed
- Ensure Maximo Middleware is Installed
- Ensure SQL Server is running

Steps:

1. Stop the mxserver by logging into the Websphere Administration Console. Navigate to Server > Server types. Select the mxserver by checking the check box to the left of the name and click stop
2. Open command prompt
3. Navigate to C:\IBM\SMP\Maximo\tools\maximo
4. To create the sample database type `maxinst -sPRIMARY -tPRIMARY -m2`
5. Click Enter to create the database
