

Tech Tip

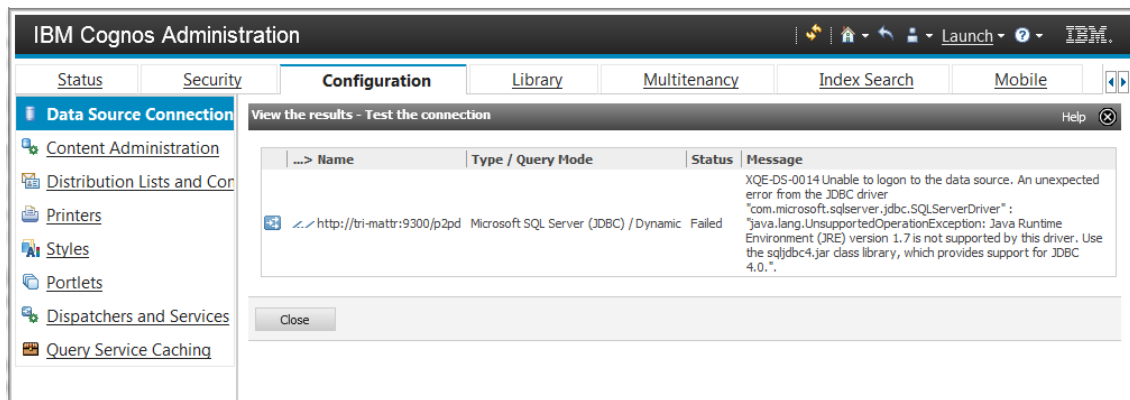

XQE-DS-0014 Error when setting up JDBC Connection

Products: Cognos 10.2.1, SQL Server 2008 R2

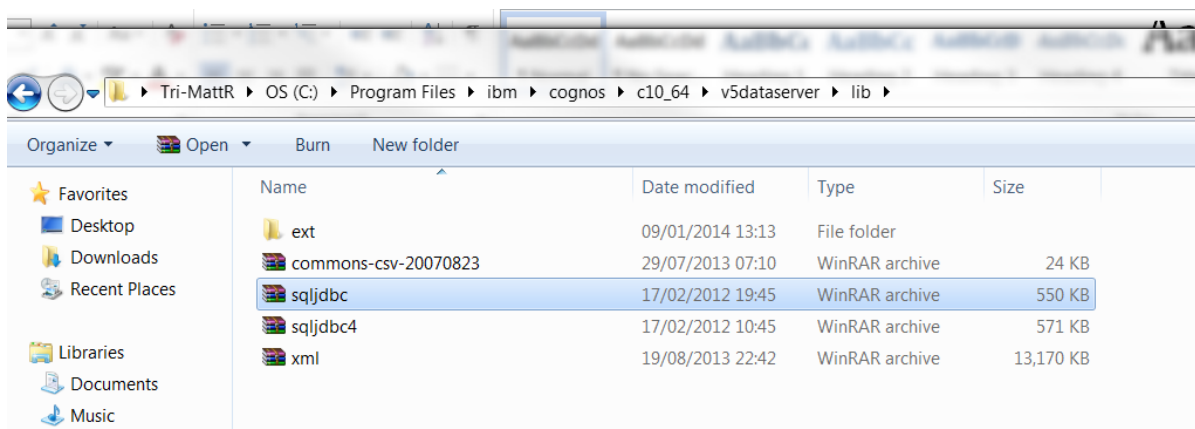

Document Number: TRI-COG-DQA-002

This document describes what to do if you get the XQE-DS-0014 error when configuring JDBC connections in Cognos 10.2.

1. When testing your JDBC connection you receive the following error:

2. This is probably because you have pasted the sqljdbc.jar file in the following directory < Cognos install directory > / v5dataserver / lib

3. Delete the sqljdbc.jar file from the v5dataserver lib directory. Please note the file may be locked. To unlock the file stop the Cognos services and exit Cognos Configuration.
4. Restart the Cognos Services and re-set up your data source connection
5. When you retest the jdbc connection you should see succeeded.
